

TECHVOLT

Return & Refund Policy

General information about eligible returns, damaged or incorrect products, cancellations, replacements, and refunds.

1. Return Eligibility

TechVolt may accept returns for eligible products when the product is unused, in its original condition, and returned within the return period specified by TechVolt. Eligibility may depend on product type and order status.

2. Return Period

Eligible return requests should be submitted within the return period stated by TechVolt after delivery. For this academic project template, a specific number of days can be configured by the project owner before real-world use.

3. Non-Returnable Products

- Products that have been used, damaged through improper handling, modified, or altered may not be eligible for return.
- Products with missing parts, accessories, packaging, or documentation may be subject to return restrictions.
- Certain product categories may be designated non-returnable where permitted by applicable law.

4. Damaged or Incorrect Products

If a product arrives damaged, defective, or different from the item ordered, contact TechVolt promptly with the order number, a description of the problem, and photographs or other evidence when requested.

5. How to Request a Return

- Contact TechVolt through the Contact Us page with your order details.
- Explain the reason for the return and provide supporting information if requested.
- Wait for return instructions before sending the product back.
- Package the product securely and follow the return instructions provided by TechVolt.

6. Return Shipping

Responsibility for return shipping costs depends on the reason for the return and the applicable return rules. If a product was incorrectly supplied or arrived damaged, TechVolt may provide appropriate instructions for the return.

7. Inspection

Returned products may be inspected to confirm their condition and eligibility. A refund or replacement is processed only after the return is approved under the applicable policy.

8. Refunds

Approved refunds are issued using the applicable payment or refund method. The time required for the refund to appear may depend on the payment provider or financial institution.

9. Order Cancellation

Cancellation requests should be submitted as soon as possible. An order that has already been processed or dispatched may not be cancellable and may instead be handled under the applicable return policy.

10. Exchanges and Replacements

Where supported, TechVolt may offer a replacement for an incorrect, damaged, or defective product instead of a refund, subject to product availability and applicable policy.

11. Policy Changes

TechVolt may update this Return & Refund Policy as its products, order process, or applicable requirements change. The current version should be published on the website.

12. Contact

Customers with return or refund questions should contact TechVolt through the Contact Us page and provide their order details.

Note: This document is a general policy template prepared for the TechVolt academic e-commerce project. It is not legal advice and should be reviewed and customized before use by a real commercial business.
